

Overview

HP Client Virtualization is an end-to-end client virtualization solution based on the best managed and virtualization-ready HP ProLiant and BladeSystem servers, HP storage, and HP Thin Client access devices. It is a desktop replacement solution that delivers to IT teams the flexibility to quickly deploy and refresh desktops, the reduction of associated potential data loss or theft. It also lowers the complexity and cost of desktop management, while continuing to provide end-users with the functionality of a stand-alone desktop.

The HP Client Virtualization with VMware View offering is based on VMware's industry leading and proven virtualization platform and HP Thin Clients that have been certified to work with VMware View Manager. This end-to-end solution from HP lets you streamline desktop management and control and deliver complete desktop environments with greater application compatibility. Purpose-built for delivering desktops as a managed service, VMware View provides the best end user experience and transforms IT by simplifying and automating desktop management. Centrally maintaining desktops, applications and data; reduces costs and improves security while at the same time increases availability and flexibility for end users. Unlike other desktop virtualization products, VMware View is a tightly integrated end to end solution built on the industry leading virtualization platform allowing customers to extend powerful business continuity and disaster recover features to their desktops and standardize on a common platform from the desktop through the datacenter to the cloud.

What's New

- HP offers VMware View 5.0 and ThinApp 4.x
- The VMware View 5.0 offering from HP includes
 - Enterprise and premier starter kits and bundles in 10 and 100 pack bundles.
 - Add-on packs to enterprise and premier offerings
 - Upgrades from add-on to enterprise and premier bundles
- The VMware ThinApp offering from HP includes
 - ThinApp Suite
 - ThinApp Client License in 100 pack bundles
- All VMware View and ThinApp software from HP will be available bundled with 1 year 9x5 support and subscription or 3 year 9x5 support and subscriptions
 - Software bundled with 1 year 9x5 support and subscription is upgradable to 1 year 24x7 support and subscription
 - Software bundled with 3 year 9x5 support and subscription is upgradable to 4 year, 5 year 9x5 support or 3 year, 4 year, 5 year 24x7 support

At A Glance

- HP offers VMware View 5.0 and VMware ThinApp 4.x
- All VMware View and ThinApp software is available in physical and electronic delivery formats
- HP Client Virtualization with VMware View comes as an end-to-end solution leveraging integrated virtualization software, reliable ProLiant and BladeSystem server platforms, HP thin clients portfolio and best in class manageability software for physical and virtual infrastructure.
- HP serves as the single point of contact for HP Client Virtualization with VMware View offerings and provides 1 year or 3 year 9x5 support services and upgrades with every purchase. Options are available to upgrade to 24x7 and/or multi-year support at any time.
- HP Critical Advantage support available as 1/3year option for Mission Critical Services will help you build, operate and continuously improve your environment to achieve business IT goals by bringing in end-to-end service.

NOTE: The gt77xx series models, t5145, t5540, t5545 and t5630w are no longer available for purchase. Current customers using these devices will be able to use them with View 5.0
- ThinApp supports:
 - ThinApp supports various operating systems, applications, and systems.
 - 32-bit platforms include Windows NT, Windows 2000, Windows XP, Windows XPE, Windows 2003 Server, Windows Vista, Windows Server 2008, and Windows 7
 - 64-bit platforms include Windows XP 64-bit, Windows 2003 64-bit, Windows Vista 64-bit, Windows Server 2008 64-bit, Windows Server 2008 R2 64-bit, and Windows 7 64-bit
 - 16-bit applications running on 32-bit Windows operating systems
 - 32-bit applications running on 32-bit and 64-bit Windows operating systems
 - Terminal Server and Citrix Xenapp
 - ThinApp supports Japanese applications captured and run on Japanese operating systems. Certain operating systems and applications are not supported by ThinApp.
 - 16-bit or non x86 platforms such as Windows CE
 - 64-bit applications running on 32-bit or 64-bit Windows operating systems
 - 16-bit applications running on 64-bit Windows operating systems

Product Features

Flexibility

- Customers can purchase the end-to-end solution from HP in conjunction with the server and storage management software for physical and virtual infrastructure.
- The HP Client Virtualization with VMware View is available in complete bundles as well as a la carte versions for existing ESX or View customers.
- HP serves as the single point of support for the VMware View solution with integrated HP offerings.
- Customers may upgrade the standard 1-year 9x5 unlimited support and subscription service bundled with their VMware software to either 1-year 24x7 or 3-year 9x5 or 24x7 support or 4-year 9X5 or 24X7 or 5-year 9X5 or 24X7.

Manageability

- Utilize the best run server infrastructure with the Insight Control Environment: time-smart management software that delivers total control, maximum flexibility, and tangible savings for your unified physical and virtual ProLiant and BladeSystem infrastructure. Based on HP Systems Insight Manager and ProLiant Essentials software, the Insight Control suites deliver comprehensive system health, remote control, vulnerability scanning and patch management as well as flexible deployment and power management in one easy to install package.
- Integrated with HP Systems Insight Manager, Virtual Machine Manager (VMM), provides unified management of virtual machines and supports HP ProLiant host server resources:
 - Provides the ability to manage both physical and virtual resources from a single management console.
 - Simplifies day-to-day management and operation of virtual machines.

Client Manageability

- Complement your server management software with HP's best in class client management solutions
 - Use HP Device Manager, which is included in the price of all HP thin clients, to manage, report on and automate the usage and deployment of all HP thin clients.
 - Use HP Client Automation to manage HP thin clients, PCs, mobile devices and virtual machines.
 - Or select HP's supported 3rd party solutions
 - Symantec Altiris Deployment Solution to manage thin clients and PCs
 - Microsoft System Center Configuration Management to manage Windows based clients

HP ProLiant Server Support

- HP ProLiant server support software is available for download.
- The VMware HCL has been updated to include all certified HP ProLiant servers.
- For more information on HP's Certified and Supported ProLiant servers please visit the VMware Server Support Matrix at:
<http://h18004.www1.hp.com/products/servers/software/vmware/hpvmwarecert.html>

HP Web Sites

- VMware from HP: <http://www.hp.com/go/vmware>
- Available from: <http://www.hp.com/go/vmware>:
 - HP & VMware white papers and planning tools
 - VMware online sizing tool
 - HP & VMware news and information
 - Download Software: www.software.hp.com

Supported Product

- VMware ESX software is supported and certified on a broad range of HP ProLiant Servers including BL, DL, and ML server series products.
- HP provides the best in class unified management of physical and virtual servers, storage, virtual devices and clients.
- A broad range of HP thin clients is available for end point access devices. For more information on HP Thin Clients, please check www.hp.com/go/thinclient. The solution supports an exhaustive set of OS for Virtual desktops and end point devices.

Component	Description
vSphere	VMware vSphere, the industry's first cloud operating system, dramatically reduces capital and operating costs and maximizes IT efficiency-with the freedom to choose any application, OS, or hardware. The VMware View solution leverages the proven VMware vSphere virtualization software to consolidate desktop environments on to servers in the data center. Support for VI 3 ends with View 5.0
vCenter Server	vCenter is virtual infrastructure management software that centrally manages VMware vSphere environments providing IT administrators improved control over the virtual environment compared to other management platforms. It provides centralized control and visibility at every level of virtual infrastructure. VMware View makes the testing, provisioning and support of applications and desktops much easier and less costly. From a central location you can deliver, manage and update all of your Windows desktops and applications in minutes.
VMware View Manager	View Manager is an enterprise class desktop management solution, which streamlines the management, provisioning and deployment of virtual desktops. Users securely and easily access virtual desktops hosted on vSphere, Terminal Servers, Blade PCs or even remote physical PCs through View Manager. Virtual desktop upgrading and patching are done centrally from a single console so you can efficiently manage hundreds or even thousands of desktops-saving time and resources.
ThinApp	ThinApp application virtualization software decouples applications from operating systems and packages them into an isolated and encapsulated file. This allows you to run multiple versions of applications on a single desktop without conflict, or the same version of an application on multiple operating systems without modification. Reduce storage needs for virtual desktops and simplify application management by streaming applications packaged with ThinApp from a centralized server or a shared network drive.
View Composer	View Composer uses VMware Linked Clone technology to rapidly create desktop images that share virtual disks with a master image to conserve disk space and streamline management. User data and settings are separated from the desktop image, so they can be administered independently. All desktops that are linked to a master image can be patched or updated simply by updating the master image, without affecting users' settings, data or applications. This reduces storage needs and costs by up to 70% while simplifying desktop management.
View Persona Management	View Persona Management enables customers to enable a dedicated desktop experience while deploying floating desktops by preserving the user persona between sessions. View Persona Management is different than Roaming Profiles and has no dependence on roaming profiles but works seamlessly with existing roaming profiles deployments at customer sites.
Local Mode	The VMware View Client with Local Mode allows end-users to run managed virtual desktops locally without a network connection. Offline users can synchronize desktop changes back to the datacenter when they return to the network. The entire contents of the desktop are secure within an encrypted desktop image while all existing IT security policies for that virtual desktop continue to be applied and enforced regardless of network connection.
Insight Control (IC)	Based on HP Systems Insight Manager and ProLiant Essentials software, the Insight Control suites deliver comprehensive system health, remote control, vulnerability scanning and patch management as well as flexible deployment and power management in one easy to install package for a unified virtual and physical infrastructure. HP Insight Control provides

Supported Product

comprehensive management for ProLiant ML/DL customers, while HP Insight Control for BladeSystem provides additional functionality targeted at specifically at HP BladeSystem environments.

Environment-friendly Products and Approach	End-of-life Management and Recycling	Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: http://www.hp.com/go/green . To recycle your product, please go to: http://www.hp.com/go/green or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.
--	--------------------------------------	--

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.
